
printreleaf™

You print one. We'll plant one.

PrintReleaf Certification empowers you to sustain and grow our global forest system...one print job at a time.

automatic. precise. verified.

PrintReleaf is the world's first platform that automatically converts your paper footprint into actual trees. As you print, you actively replant trees in forests that need it most around the world.

With PrintReleaf, resources borrowed from the earth can be returned and multiplied after use. Through our verified reforestation process, we guarantee 100% net survival of the trees you plant.

Now you can reforest... one print job at a time.

www.printreleaf.com

Software built in Denver, Colorado. Trees planted around the world.

How It Works

PrintReleaf measures your paper footprint based on your cumulative printing. This is done automatically through integrations with market-leading software applications. Then, customers may select where to reforest their consumption through our network of PrintReleaf Certified™ Global Reforestation Projects. Our cloud-based infrastructure and APIs enable seamless integration and limitless scalability.

STEP ONE

YOU PRINT. WE MEASURE.

There is nothing to install on your server. By leveraging the power of the **cloud**, PrintReleaf is built for scale.

We use your paper consumption totals to calculate your **paper footprint** which is equal to a specific and accurate number of trees.

STEP THREE

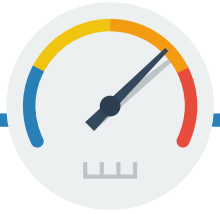
YOU PLANT TREES.

You are empowered to **releaf** forests based on your paper footprint. The reforestation projects you releaf are up to you!

You can monitor your cumulative environmental impact on your **PrintReleaf Dashboard**.

printreleaf™

You continue printing according to your needs.



PrintReleaf **automatically** measures your paper consumption totals through third-party integrations.

STEP TWO

WE CALCULATE & CONVERT.

printreleaf CERTIFIED

PrintReleaf provides **certificates and reports** about the forests you have releafed over time.

Verified Reforestation

There are PrintReleaf Certified Global Reforestation Projects in:

- Brazil
- Dominican Republic
- India
- Ireland
- Madagascar
- Mexico
- United States

FOREST MANAGEMENT CERTIFICATION PRX SGS

SGS International, the world's leading inspection, verification, testing and certification company, certifies our Global Forestry Partners and leads field audits across our network of projects to verify **100% net survival** of our forests.

Benefits

With PrintReleaf, you can be part of the solution. You can also be sure the process is automated, precise, verified, and will benefit your brand's image.

Environmental Reforestation
Reforestation provides environmental and ecological reforestation where the planet needs it most.

Automation
Completely automated, end-to-end integration from printer to seedling with no software to install.

Certification
The PrintReleaf ecosystem is verified by our third-party certifying body, SGS International.

Recognition
Through awareness, social marketing, and certifications, you can see and share the positive impact you have on forests around the world.
